CLAIMS

1. A method for producing modified gum arabic, the method comprising the step of heating gum arabic under dry conditions.

5

- 2. The method for producing modified gum arabic according to Claim 1, the method comprising the step of heating gum arabic in such a manner that the loss-on-drying is not more than 3%.
- 10 3. The method for producing modified gum arabic according to Claim 1, wherein gum arabic is heated at a temperature of 90°C to 180°C.
- 4. The method for producing modified gum arabic according to Claim 1, the method comprising the steps of drying gum arabic until the loss-on-drying is not more than 3%, and subsequently heating the dried gum arabic.
 - 5. The method for producing modified gum arabic according to Claim 1, wherein gum arabic is heated at reduced pressure.

20

- 6. The method for producing modified gum arabic according to Claim 1, wherein gum arabic to be heat treated has an average particle diameter of not more than 1.5 mm.
- 7. The method for producing modified gum arabic according to Claim 1, wherein gum arabic to be heat treated is spray-dried.
- The method for producing modified gum arabic according to Claim

 wherein discoloration is suppressed and emulsifying ability is

 increased in the modified gum arabic.
 - 9. Modified gum arabic, which is obtained by a production method of Claim 1.
- 35 10. An emulsifier, comprising as an active ingredient a modified gum

arabic obtained by a production method of Claim 1.

10

20

- 11. A method for preparing an emulsion, wherein a modified gum arabic obtained by a production method of Claim 1 is used as an emulsifier.
- 12. The method for preparing an emulsion according to Claim 11, wherein the emulsion is an O/W or W/O/W emulsion which contains, as a dispersoid, at least one hydrophobic substance selected from the group consisting of essential oils, oil-based flavorings, oil-based colorants, fat-soluble vitamins, polyunsaturated fatty acids, animal oils, vegetable oils, sucrose acetate isobutyrate, and medium-chain triglycerides.
- 13. An emulsion, which is prepared by a preparation method of Claim15.
 - 14. The emulsion according to Claim 13, which is an O/W or W/O/W emulsion containing, as a dispersoid, at least one hydrophobic substance selected from the group consisting of essential oils, oil-based flavorings, oil-based colorants, fat-soluble vitamins, polyunsaturated fatty acids, animal oils, vegetable oils, sucrose acetate isobutyrate, and medium-chain triglycerides.
- 15. Use of a modified gum arabic obtained by a production method of Claim 1 for preparing an emulsifier.
 - 16. Use of a modified gum arabic obtained by a production method of Claim 1 for preparing an emulsion.
